8 August 1977

MEMORANDUM FOR: Chief, Operations, OC

INFO : Chief, Engineering, OC

STATINTL

STATINTL FROM

STATINTL SUBJECT

: [REDACTED] Resources Review and Office Space
Complex Proposal (U/AIUO)

STATINTL

1. (U/AIUO) [REDACTED] has expanded in operation so rapidly this past year that it was deemed necessary to review the resources required to meet our current commitments.

2. (U/AIUO) This study has revealed a shortage of space for our current and near future (early FY-78) requirements. Office space is most deficient as people have been moved to make room for black patch, SKYMUX, and ARS equipment. A more detailed description of space requirements and recommendations for a new office complex is outlined in Attachment "A".

3. (U/AIUO) A personnel review has revealed that the level as approved by the ceiling board in Dec 1975 will be sufficient when all slots are filled. There will, however, be some in-house realignment in the Engineering Staff.

4. (U/AIUO) Other station deficiencies are being addressed in separate studies, i.e., air conditioning, MAX replacement, auto patching, etc.
